

Project Titan: Classified Briefing

Subject: Initialization of Project Titan

Date: June 19, 2026

Clearance Level: Top Secret

1. Overview

Project Titan is an advanced autonomous drone initiative designed for deep-sea exploration. The primary objective is

2. Technical Specifications

- Power Source: Miniature Radioisotope Thermoelectric Generators (RTGs).
- Communication: Quantum Entanglement Nodes (QEN) allowing zero-latency data transmission through water.
- AI Core: The central intelligence is an isolated version of the JARVIS neural network, optimized for high-pressure f

3. Current Status

The swarm is currently stationed at the Marianas Base Alpha. Deployment is scheduled for 0800 hours tomorrow.

4. Potential Risks

Unmapped thermal vents may disrupt the QEN signals. If communication is lost, the drones are programmed to ascend
